POSITION DESCRIPTION

**Percentages of time spent on each job duty will vary daily, as well as based on project.*

Reporting to the General Manager, the Central Office Manager, will be responsible for managing and oversight of the planning, design, and installation of the software and hardware for GBT's internal and external telecommunications and networking systems. Works closely with all department managers to identify, recommend, develop, implement, and support cost-effective technology solutions for all aspects of the services offered by GBT. Develops strategic plans for services and contributes to the overall engineering and GBT strategic plans. Direct the creation of the annual budget in order to recommend major improvements to central office equipment, initiate, recommend, and purchasing of tools and supplies as well as monitoring to ensure expenditures are managed according to the annual plans. Ensures all Central Office and Systems Administrator personnel understand industry standards, safety procedures, and preventative maintenance operations of communications and data equipment installations.

ESSENTIAL DUTIES & RESPONSIBILITIES

- Manages and directs operations for the Central Office and IT departments to ensure all corporate and internet networking systems meet defined objectives in terms of performance, capacity, reliability, and availability.
- Monitor network and server performance including areas such as, processor utilization, bandwidth usage, intrusion detection, memory usage, free disk space, etc. and ensures corrective actions are taken to meet or exceed expected service levels.
- Oversees the management of all hardware and software assets by planning the systematic upgrades and replacements that addresses the financial and technological life cycle of these components.
- Monitors and manages security threats to all server, telephone, PC, and local area networks, ensure virus detection and elimination technologies are operational across the company.
- Ensures company security policies are up-to-date and protects company interests from physical and logical vulnerabilities and risks.
- Monitors all equipment for suspicious activity and/or possible breaches of security.
- Conducts audits and tests to ensure end-to-end security meets established standards.
- Performs regular tests of all data recovery and equipment restoration capabilities.
- Ensures daily backup of all critical information and verifies backups for successful completion. Ensures backups are stored at an offsite location. Ensures all relevant backup and documentation is current and complete
- Manage the capital and expense budget for Central Office and IT Department
- Manage the technical education and professional development of the CO and IT staff.
- Drive continuous improvement in business processes through continuous technology improvements: changes, upgrades, and enhancements.
- Stay current on new/emerging technologies that could be applicable to GBT through personal research, seminars, conferences, etc.
- Continuously search pricing alternatives for currently approved infrastructure equipment.
- Manages and supervises staff in Central Office, and IT departments
- Engage with other members of senior management to facilitate cross department collaboration to ensure network systems and solutions positively support GBT's evolving strategy and operational delivery.

(Continually looks for new and improved ways of completing the above functions. Other tasks as assigned by supervisor will be performed to address unexpected situations or needs that may arise.)

KNOWLEDGE, SKILLS & ABILITIES

- Demonstrated excellence in forecasting network related expenditures and preparing the department budget, determining timelines, setting project schedules, planning upgrades, patching deployment, performing cutovers, routine maintenance, and delegation of the tasks
- Skill in developing, examining, reengineering, and recommending network policies and procedures
- Ability to monitor the network and all associated equipment to determine network stability, traffic through-put, linking outages, and other events that are detrimental to customers services, maintaining routers, switches, firewalls and servers, resolving network related issues across multi-vendor hardware and software, evaluate and test network and protocol related functions and processes.
- Growing and building the network for the purpose of ensuring the network is always able to provide necessary services for all customers.
- Ability to design, provision, and program equipment required for growth of the internet network to include new sites and upgrades to existing sites.
- Ensure administration of the system for the purpose of ensuring the network operates efficiently and effectively.
- Tracking and analyzing network and service-related data flow to determine if there is a need for upgrades or configuration changes to existing service deployments, studying industry trends, vendor information, and technology capabilities to make recommendations to management.
- Maintain up to date knowledge of the latest technology advancements and network management best practices, assisting in research and development.
- Strong analytical skills and experience in interpreting a strategic vision into an operational model
- Collaborative and flexible, strong service mentality, team player committed to organizational success and lifelong learning
- Motivate and retain a team of professionals using excellent leadership and critical thinking skills
- Ability to roll up sleeves and participate in essential, day to day work, with desire to work in a dynamic, strategic driven, value-based environment
- Astute business acumen, excellent communication skills, both written and oral
- Highly proficient in common industry recognized practices & certifications
- Highly organized with the ability to optimize among multiple competing priorities
- Display respect and maintain a good reputation in the community
- Ability to manage a team of people, continuously evaluating and proposing operational improvements for better efficiency, motivating employees, and advocating for their personal growth and development, providing executive coaching, providing a good experience, and support, ensuring they have the tools they need to do the job right, ensuring you are willing to listen in order to gather ideas and suggestions, and take them into consideration
- Ability to provide the experience, the GBT way.

EDUCATION & EXPERIENCE:

High school diploma or GED, required. A candidate with Bachelor's degree in Technology, Electronics or related field and/or 5 + years of experience in related field, preferred. Ideal candidate has prior management or proven leadership background experience, preferred.

RESPONSIBILITIES: This position requires the ability to lead and participate as a member of a team to complete tasks and engage in problem solving activities. Therefore, must relate well to others since motivating a team of professionals in the form of informal training/coaching/mentoring will be required.
